Abstract

This paper is dedicated to improving important aspects in the development of third party audits in order to achieve an effective assessment of the audit for certification organizations have areas of activity: development, design and manufacture of products and spare parts for industry car. Audit program is dimensioned from the organizational process map identified in the audited organization. This is important to establish an organization to optimize processes in order to evaluate effectively audited quality management system in accordance with ISO / TS 16949:2009 requirements. Even if the document is binding, its contents not specifically stated in the official journal of IATF documents. Degree of complexity should provide a clear and concise description of organizational functioning.

Keywords: Quality Management Systems, Manufacturing, ISO / TS 16949:2009.
