Abstract

The paper presents the results obtained during the educational program “I can also get good grades!” organized along two years by “Prof. Coman” Foundation and sponsored by SRAC, addressed to pupils of the 7th grade from “Radu Greceanu” Highschool from Slatina, Olt. The pupils learned how to work in a team, how to value their scholar activity and how to use the PDCA cycle for their educational activities, both at school and at home.
