Abstract

Using referential ISO standards of management systems, the author makes a succinct and schematic commentary on the issue of risk management as a challenge or good practice. The article is illustrated with a flow chart for the application of risk and opportunity-based thinking and a scheme that includes the stages of risk-based and opportunity-based thinking. In conclusion, a risk-management plan is presented that solves the implementation stages of risk-based thinking, such as: establishing treatment actions, planning for the integration and implementation of actions, implementing actions and assessing their effectiveness.

Keywords: risk management, ISO 9001, ISO 14001, ISO 31000, ISO 45001, risk and opportunity - based thinking
